BEEF UP YOUR BOTTOM LINE WITH NFC TECHNOLOGY

GANTNER is the leading developer of NFC technology, specially designed for the fitness industry. GANTNER creates an environment that enables access control, check-in, lockers, and cashless payment to operate with a single NFC membership credential: card, wristband, or key tag. Always with an eye towards the future, GANTNER provides innovative solutions that ensure your club is mobile ready. With cutting edge technology, members enjoy a more convenient and secure visit to the club, while you see a quick return on investment thanks to reduced operating costs and increased secondary income. GANTNER combined with 3rd party club management software creates a fully integrated system solution to beef up your bottom line.

- Improve security with a robust access control solution.
- Streamline operations with automated check-in.
- Go mobile with your club management system.
- Benefit from superior locker room management.
- Boost income with cashless payment.

ACCESS CONTROL

From 24-hour doors to more complex access control solutions with biometric verification, GANTNER NFC access control products guarantee the security you need. Our systems have integration with the world's largest club management software companies and are designed to connect with a wide range of third party doors and turnstiles.

FEATURES

- Increased club security.
- Speedy and efficient access control.
- One integrated, seamlessly functioning access control system across your entire club.
- Reduced staff demands due to automation.

Control Club Access

24-HOUR FACILITIES

Automate access control and reduce staff demands and increase security.

VIP AND DAY CARE ACCESS

Restrict entry to designated areas and improve member experience.

CHECK-IN/-OUT

Thanks to leading NFC solutions from GANTNER, check-in/-out has never been so quick and easy. With automated check-in solutions, a club gains the power to know who is checked-in and how often. Do your members like to use a locker or make a purchase? If yes, in a GANTNER-run facility operators can require members to check-in first. For additional levels of security, Biometric Verification provides the solution you need.

FEATURES

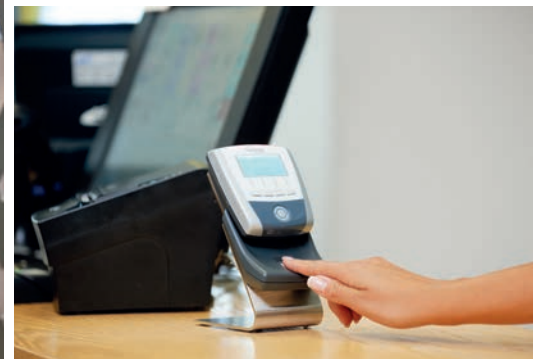

- Information on members present in the club.
- Possibility for self check in.
- Quick check in procedures.
- Check in is required to use a GANTNER secured locker or cashless payment device.

Easy Check In/Out

BIOMETRIC VERIFICATION

Prevent membership sharing and reduce lost revenues.

SELF CHECK-IN

Reduce staff demand and automate processes.

MOBILE CLUB MANAGEMENT

GAT MOBILE.Connect

With the new GAT MOBILE.Connect, mobility in the leisure industry is redefined. This innovative app, suitable for NFC-compatible smartphones and tablets, offers the ability to check-in, display member information or sell services regardless of location. Thanks to GAT MOBILE.Connect, your club management system is now available where and when you need it.

FEATURES

- Check in functionality.
- Provides valuable information about class participation rates.
- Smartphones turn into an additional POS.
- Generation of additional information for establishing detailed member profiles.

Improved Club Management

FLEXIBILITY

Check-in capability, when and where you need it.

ENHANCED DATA STREAMS

Valued information about class participation rates.

MOBILE CREDENTIAL

GANTNER.Connect

With the new GANTNER.Connect, members can now take advantage of all NFC amenities in your club with their NFC-enabled mobile phones. Benefits of the GANTNER.Connect does not stop with member convenience. The platform empowers clubs to send customized push notifications and messages to members' phones and is a powerful tool to improve member engagement and retention.

FEATURES

- 24-7 functionality, regardless of internet or cellular connectivity (app and cloud services).
- Ability to send push notifications to member phones.
- Quick and easy administration of a member's ability to use club amenities.
- Use of a NFC smartphone for check-in, locker usage, cashless payment, and more.
- Capability to integrate with 3rd party apps.

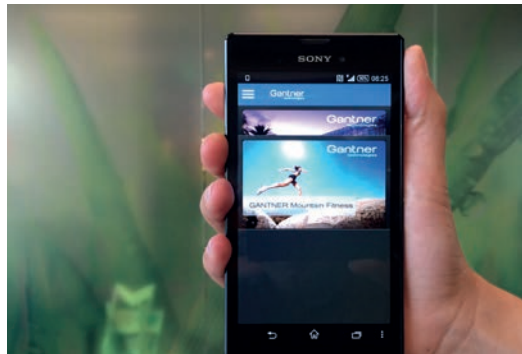

Be mobile

MEMBER ENGAGEMENT

Send push notifications for daily specials.

NEW POSSIBILITIES

Book training online or use special discounts.

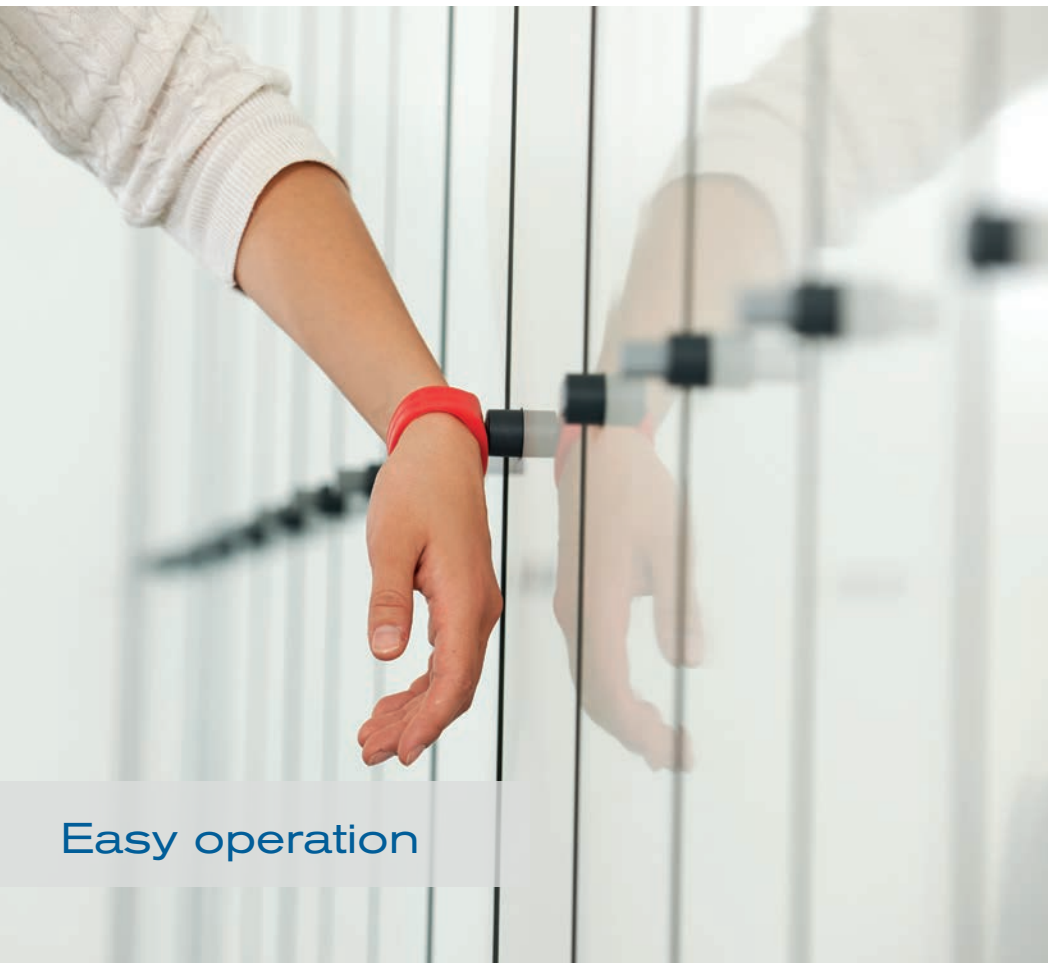

BATTERY LOCKING SYSTEM

GAT Lock 6010

In the GANTNER world, keys are a thing of the past. Today belongs to electronic locking and the hassles of key administration are gone. GAT Lock 6010 is the ideal solution for clubs seeking a cost-effective, battery operated lock for lockers.

FEATURES

- Easy retrofitting for all locker materials.
- Multiple operating modes – free, personal, and timed.
- Electronic master keys for club operators.
- Operates with all NFC credentials (mobile phone, card, wristband, key tag).
- Optional info terminal for used locker number display.

Easy operation

EASY RETROFIT

Easy to retrofit in all types of lockers in existing locker rooms.

BATTERY LOCKING SYSTEM

GAT ECO.Side Lock

Since its release, the new GAT ECO.Side Lock has been recognized across the globe for remarkable innovation. GAT ECO.Side Lock is the world's first battery lock to include up to a 10-year battery life, acoustic alarm function, and complete in-locker mounting.

FEATURES

- Up to 10-year battery life (due to Low Power Technology).
- Acoustic and visual alarm function at the locker.
- Sleek and elegant design with complete in-locker mounting.
- Vandalism Proof.
- Multiple operating modes – free, personal, and timed.
- Electronic master keys for club operators.
- Operates with all NFC credentials (mobile phone, card, wristband, key tag).

INFO TERMINAL

Display a used locker number or select account information.

LOW POWER TECHNOLOGY

Anticipated service life of 10 years, no battery replacement necessary.

NETWORKED LOCKING SYSTEM

GAT NET.Lock 7000

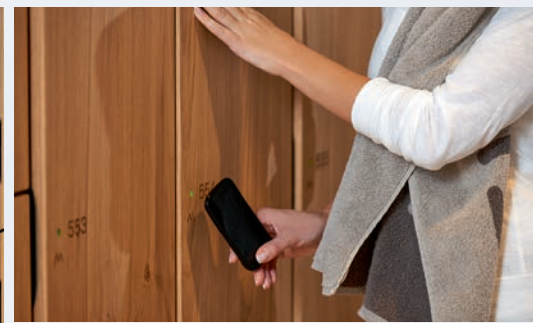

Eliminating the problem of forgotten pin codes, lost keys, or blocked lockers, GAT NET.Lock 7000 is the ultimate in locker room management. Run by the powerful GAT Relaxx Software, the networked locking system's features include real-time occupancy monitoring, a networked alarm, automatic opening function for overnight cleaning and much more. GAT NET.Lock fulfills the clean door policy and is sure to meet the high aesthetic demands of architects and owners. Never before has it been easier to gain control of your locker room!

FEATURES

- Sleek and elegant design with complete in-locker mounting.
- Vandalism proof.
- Red and Green LED Light for status display.
- Maintenance free.
- Operates with all NFC credentials (mobile phone, card, wristband, key tag).
- Optional info terminal for used locker number display.

Enhanced Member Experience

SLEEK DESIGN

A clean door for an elegant effect.

MULTIPLE OPERATING MODES

Free, personal, rental and timed operating modes possible.

MANAGEMENT SOFTWARE

GAT Relaxx

GAT Relaxx is used for the visualization, surveillance, and configuration of the GAT NET.Lock 7000 locking system. Apart from displaying the occupancy and alarm status, the software provides central functions such as automatic openings, statistical reporting, and remote control of lockers. GAT Relaxx software can be integrated into 3rd party club management software, all to make locker management easy for you.

FEATURES

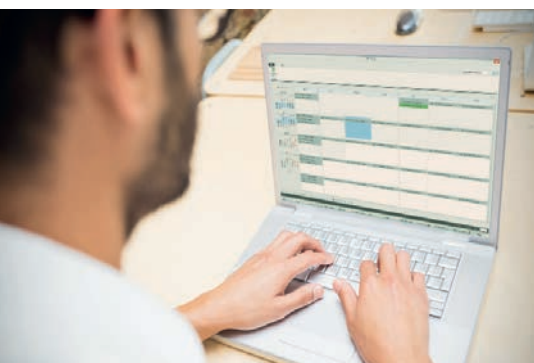

- Server Client Solution.
- Locker reservations possible.
- Alarm monitored burglary protection.
- Real-time occupancy monitoring.
- Adjustable, automatic opening function for cleaning or overnight security purposes.
- High level interface to club management software possible.
- Configuration of the locker system.

Superior Locker Management

ALARM FUNCTION

Break-in alarm message on the network (PC, text message, e-mail).

LOCKER MANAGEMENT

Know what lockers are in-use and control locker usage from your front desk.

CASHLESS PAYMENT

Cashless Payment is the way of the future. Just imagine members conveniently purchasing goods and services with their membership card or wristband. No need to carry cash or credit cards! The GANTNER cashless payment system can be pre-loaded or integrated into your existing billing system.

FEATURES

- > Increased revenue.
- > Complete transparency on every transaction.
- > Reduced staff and money-handling demands.
- > Reduced waiting times at point-of-sale stations.
- > More accurate customer profiling for more effective marketing.

Boost Secondary Income

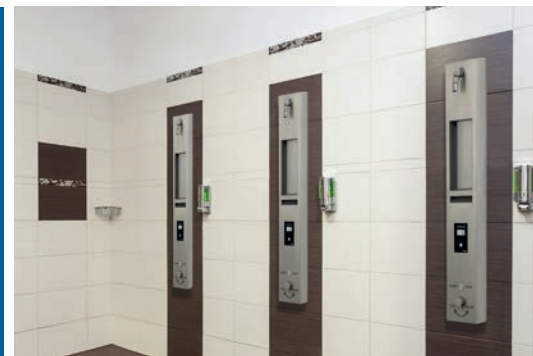

TIMED-SERVICES

Automate the process of selling timed-services – sun beds, power plates, showers, and more.

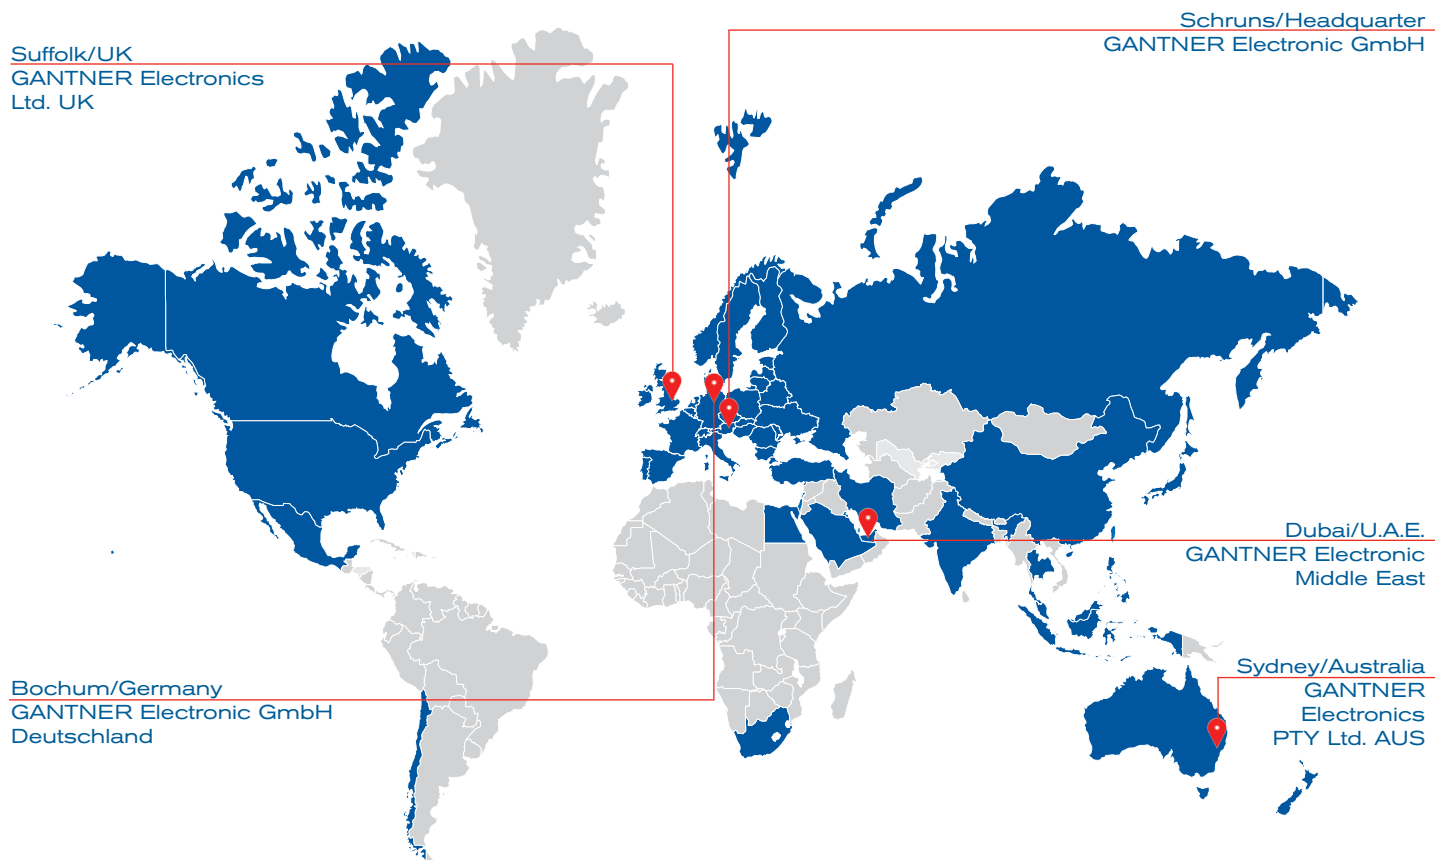

EFFECTIVE MARKETING

Understand your members' purchasing behavior for improved marketing.
